

TEMPERATURE MEASUREMENT

Features

- Records and displays four channels (eg: the air and object temperature)
- Diagnostic software - RS232 transfer to PC for comprehensive evaluation and performance reports
- Auto range
- Auto power off (selectable)
- Hold and Max/Min functions
- Memory for 16,000 readings per channel

Four-channel Datalogger monitors any temperature application.

Complete with:

- Interface Cable
- Datalogger Software
- Operating Instructions
- USB Cable

Probes available separately: Lengths to your requirement

- Stainless Steel
- PTFE / Fibreglass cable with clamp

Specifications

Range

Logger: -200°C to +1370°C
Operating: 0°C to +50°C

Resolution:

0.1°C -200°C to +200°C
1°C +200°C to +1350°C

Accuracy:

±0.3%rdg+1°C

Recording interval:

1 sec to 1hr 40mins
(1 to 99mins 99 secs)

Memory:

16,000 readings *per channel*

Dimensions:

184 x 64 x 30mm

Weight:

220g (approx)

Power:

9V Battery (optional power supply available)

Transfer logged readings to a computer
