

INSPECTION

0908 Digital Weld Gauge

Digital gauge with similar function to BridgeCam.

Measures: 0-20mm.

Resolution: 0.01mm

Accuracy: $\pm 0.03\text{mm}$

Working Temperature: 0°C to 40°C

Humidity: $\leq 80\%$

Operating Power: One silver oxide battery, SR44, 1.55V

60, 70, 80 & 90° Angle of preparation.

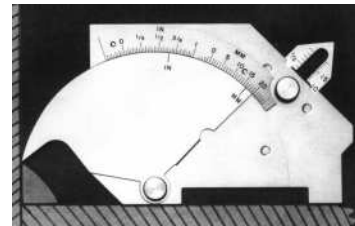

Unit does not measure undercut.

Digital

0489 BridgeCam

All in one gauge for measuring Undercut, Excess material, Fillets, Preparation angle and Misalignment.

BridgeCam

0490 Hi-Lo

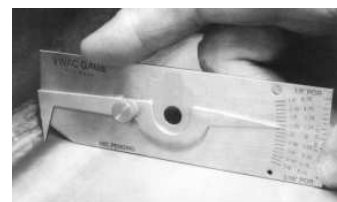

Measures Internal misalignment, Fit-up gap, Bevel on end preparation, Crown height, Pipe wall thickness and Fillet weld size.

Hi-Lo

0491 V-WAC

Measures undercut, Crown height and checks porosity.

V-WAC

0492 Weld Fillet Gauges

Combined set of gauges to measure concave or convex weld sizes for 3mm to 25mm.

Weld Fillet Gauges
