

Surface Profile/Cleanliness

PCWI International are leaders in the manufacture, certification and distribution of specialist measuring instruments relevant to the metals construction and coating industries.

Surface Analysis Kit

Features

Determination of common “invisible” contaminants on freshly blasted surfaces.
Detects Chloride ions, pH, and Soluble ferrous ions (eg. Ferrous Sulphate).
Water catchment for vertical surfaces.

Supplied with

Chloride strips (40), Ferrous Ion Strips (100), pH paper (100), Cotton Swabs,
Water guard for vertical surfaces, bottle for distilled water and Operating instructions.

Specifications

Chloride Detection Limit:	30 to 600ppm (Quantab Titrators)
Ferrous Ion Detection Limit:	3 to 500mg/i (approx)
pH Paper Range:	2 to 9; verified by colour scale

Ordering Information: Part No. SURFACEAKIT

In support of our policy of continuous product improvement we reserve the right to change materials and specifications without notice. Drawings, where used, are not to scale. All dimensions are in millimetres and sizes given are approximate. Where possible, technical MSDS data sheets are made available on the website. All products should be installed and used in accordance with manufacturer's instructions provided. Warning: products may be the subject of registered designs and patents. Refer to website for terms and conditions on warranty.
